

COUGAR LP[®]

Economical protection in a nail-gunnable roll

Cougar LP is an easy to install classic style ridge vent. It can be installed by hand or with a pneumatic nail gun (coil nails are included).

Cougar LP

Nail-gunnable ridge vent on a roll

Net Free Area	13.5 in ² /lin ft
Width	10 ½ in
Length	20 ft & 50 ft rolls
Thickness	3/5 in
Warranty	Lifetime Limited
Patents	9,200,453 US

Low-profile design provides a sleek and almost invisible protection

Compression resistant design

Nail-gunnable for fast installation

Flat back for easy application

End plug free installation saves time by shingling over

1 ¾ inch collated Hot Dipped Galvanized nails included

Code Approvals:
Florida Building Code (FL 7751)
Meets or exceeds: ICC, FHA, HUD, and NBC

Benjamin Obdyke knows Ridge Vent

In 1987, Benjamin Obdyke transformed the industry with the creation of Roll Vent, the first ridge vent on a roll. Since then, we've provided our customers with innovative products to help them Build Better™.

**1.6 million
roofs protected**

Made in USA

**Most trusted ridge vent
for over 30 years**

**Tested to highest
standards for
weather infiltration**

**Premium hot dipped
galvanized nails included**

**Now with Lifetime
Limited Warranty**

Not all ridge vents are created equally, especially when it comes to keeping attics cool and dry. Many ridge vents on the market do not provide proper protection from wind driven rain and snow. With 14 different product options, Benjamin Obdyke provides solutions that meet your attic ventilation needs.

Ridge Vent works on the basis of several principles. Adequate soffit ventilation coupled with ridge ventilation produces a pathway for continuous airflow along the entire underside of the roof deck. Airflow is maintained two ways. First, hot air naturally rises and exits out the ridge vent, pulling in cooler air from below. Second, positive airflow across the ridge of the house creates a "venturi effect" or a negative pressure, which pulls air out of the ridge vent and brings in cooler air, from the soffits below. In calm or windy weather, the entire attic is vented by a constant flow of cooler, dryer outside air.
