

# SHARK VENT®

## The fastest, most rigid way to protect a roof from heat and moisture

Meet the best of both worlds. Shark Vent combines the rigidity of a sectional vent, with the fast installation of a roll. Also available in a filtered option for additional peace-of-mind in extreme weather areas.

### Shark Vent XLP

Rigid, externally baffled, nail-gunnable ridge vent on a roll

### Shark Vent Xtra

Rigid, externally baffled, nail-gunnable ridge vent on a roll with additional filter for extreme weather areas

<b>Net Free Area</b>	12 in <sup>2</sup> /lin ft	12 in <sup>2</sup> /lin ft
<b>Width</b>	14¾ in	14¾ in
<b>Length</b>	25 ft rolls	25 ft rolls
<b>Thickness</b>	5/8 in	5/8 in
<b>Warranty</b>	Lifetime Limited	Lifetime Limited
<b>Patents</b>	7,814,715 US	7,814,715 US

**Patented internal and external baffle system prevents wind-driven rain and snow infiltration**

Compression resistant design

Easy to handle, lightweight roll

**Nail guides, slot guides and center guide to simplify the alignment of shingles and nail placement**

1 ¾ inch collated Hot Dipped Galvanized nails included

**New external baffle design that conforms better to architectural shingles**

Low-profile design creates smooth finish and resists cracking in cold weather applications

**Internal filter option available for extra protection against extreme weather (Xtra)**

Code Approvals:  
Miami Dade - XLP Only  
Florida Building Code (FL 7751) - XLP Only  
Meets or exceeds: FHA, HUD, ICC, MDC and NBC

# Benjamin Obdyke knows Ridge Vent

In 1987, Benjamin Obdyke transformed the industry with the creation of Roll Vent, the first ridge vent on a roll. Since then, we've provided our customers with innovative products to help them Build Better™.

**1.6 million  
roofs protected**

**Made in USA**

**Most trusted ridge vent  
for over 30 years**

**Tested to highest  
standards for  
weather infiltration**

**Premium hot dipped  
galvanized nails included**

**Now with Lifetime  
Limited Warranty**

**Not all ridge vents are created equally**, especially when it comes to keeping attics cool and dry. Many ridge vents on the market do not provide proper protection from wind driven rain and snow. With 14 different product options, Benjamin Obdyke provides solutions that meet your attic ventilation needs.

**Ridge Vent works** on the basis of several principles. Adequate soffit ventilation coupled with ridge ventilation produces a pathway for continuous airflow along the entire underside of the roof deck. Airflow is maintained two ways. First, hot air naturally rises and exits out the ridge vent, pulling in cooler air from below. Second, positive airflow across the ridge of the house creates a "venturi effect" or a negative pressure, which pulls air out of the ridge vent and brings in cooler air, from the soffits below. In calm or windy weather, the entire attic is vented by a constant flow of cooler, dryer outside air.
