

SHARK VENT®

The fastest, most rigid way to protect a roof from heat and moisture

Meet the best of both worlds. Shark Vent combines the rigidity of a sectional vent, with the fast installation of a roll. Also available in a filtered option for additional peace-of-mind in extreme weather areas.

Shark Vent XLP

Rigid, externally baffled, nail-gunnable ridge vent on a roll

Shark Vent Xtra

Rigid, externally baffled, nail-gunnable ridge vent on a roll with additional filter for extreme weather areas

Net Free Area	12 in ² /lin ft	12 in ² /lin ft
Width	14¾ in	14¾ in
Length	25 ft rolls	25 ft rolls
Thickness	5/8 in	5/8 in
Warranty	Lifetime Limited	Lifetime Limited
Patents	7,814,715 US	7,814,715 US

Patented internal and external baffle system prevents wind-driven rain and snow infiltration

Compression resistant design

Easy to handle, lightweight roll

Nail guides, slot guides and center guide to simplify the alignment of shingles and nail placement

1 ¾ inch collated Hot Dipped Galvanized nails included

New external baffle design that conforms better to architectural shingles

Low-profile design creates smooth finish and resists cracking in cold weather applications

Internal filter option available for extra protection against extreme weather (Xtra)

Code Approvals:
Miami Dade - XLP Only
Florida Building Code (FL 7751) - XLP Only
Meets or exceeds: FHA, HUD, ICC, MDC and NBC

Benjamin Obdyke knows Ridge Vent

In 1987, Benjamin Obdyke transformed the industry with the creation of Roll Vent, the first ridge vent on a roll. Since then, we've provided our customers with innovative products to help them Build Better™.

**1.6 million
roofs protected**

Made in USA

**Most trusted ridge vent
for over 30 years**

**Tested to highest
standards for
weather infiltration**

**Premium hot dipped
galvanized nails included**

**Now with Lifetime
Limited Warranty**

Not all ridge vents are created equally, especially when it comes to keeping attics cool and dry. Many ridge vents on the market do not provide proper protection from wind driven rain and snow. With 14 different product options, Benjamin Obdyke provides solutions that meet your attic ventilation needs.

Ridge Vent works on the basis of several principles. Adequate soffit ventilation coupled with ridge ventilation produces a pathway for continuous airflow along the entire underside of the roof deck. Airflow is maintained two ways. First, hot air naturally rises and exits out the ridge vent, pulling in cooler air from below. Second, positive airflow across the ridge of the house creates a "venturi effect" or a negative pressure, which pulls air out of the ridge vent and brings in cooler air, from the soffits below. In calm or windy weather, the entire attic is vented by a constant flow of cooler, dryer outside air.
