

BATTEN UV

UV rated batten for open joint applications

Use as a starter strip to help maintain drainage opening at the bottom of the wall with Slicker Rainscreen applications

Use as Cedar Breather perimeter vent to allow for consistent airflow openings at the eaves and rakes

25 year Open Joint system warranty

Batten UV has several unique applications throughout the Benjamin Obdyke product line. Designed to be UV stable, Batten UV works great for all open joint cladding applications. Batten UV will also work as a starter strip for the Slicker rainscreen family, maintaining a drainage opening. The consistent airflow offered by Batten UV is perfect as a perimeter vent for Cedar Breather.
