WATER WILL FIND A WAY IN.

Most building scientists not only believe this fact, but also agree that the best way to avoid issues caused by moisture in exterior walls is to provide a way for that moisture to escape.

And that's where we come in. At Benjamin Obdyke, we're passionate about protecting homes and buildings from moisture damage - and have been since 1868. Using building science as our guide, we develop solutions that allow the owner and building professional to BUILD BETTER for the long term - without breaking the bank.

We hope this guide helps you determine the best wall protection option for your project. When in doubt, call us! We're proud to be "nerds" about best building practices and welcome any opportunity to consult with building professionals or owners.

SELECTING A SYSTEM

Average rainfall per year?

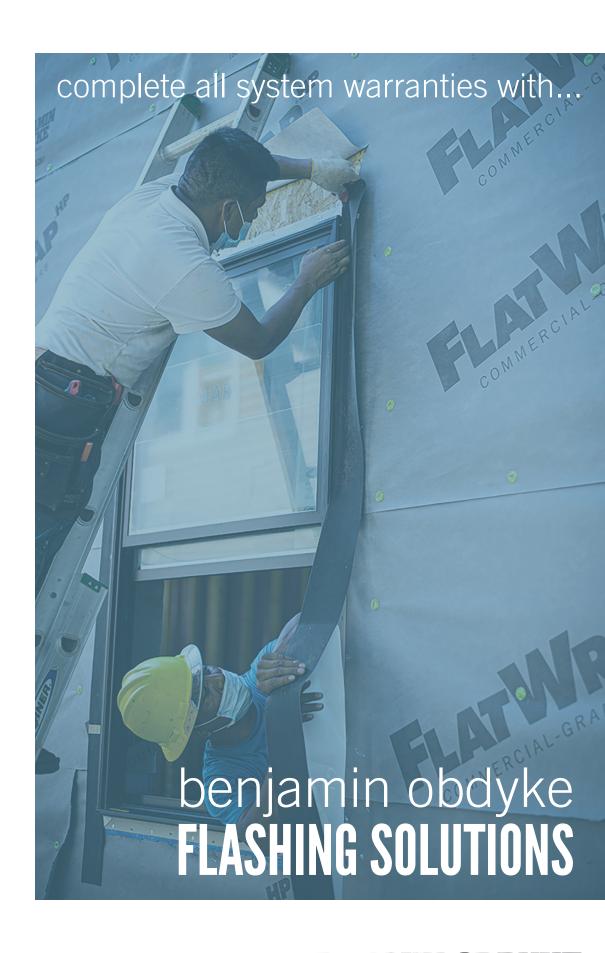

What kind of cladding will be used?

Level of budget concern?

FlatWrap® HP is a commercial-grade water-resistive barrier (housewrap). When used in conjunction with a rainscreen wall, it provides superior bulk water drainage, exceptional vapor permeability and durability.

FlatWrap HP is a perfect complement to Slicker® products as the WRB component in a rainscreen wall system. It can also be paired with HydroGap® Drainable housewrap as the required secondary layer in stone or stucco applications. Not intended for open joint applications with intentional gaps left between siding boards (check out InvisiWrap UV for these applications).

WIDTH

5 ft & 9 ft

LENGTH PER ROLL

100 ft (30.48 m)

MAX. UV EXPOSURE

120 days

VAPOR PERMEABILITY

16 perms

BENJAMIN OBDYKE

HYDROFLASH® UV+

ENHANCED ADHESION FOR EXTREME CONDITIONS

HydroFlash® UV+ is formulated with an acrylic adhesive for extreme environmental conditions. HydroFlash UV+ can be used in Open Joint Cladding systems with a 12 month UV rating before siding installation. Taping of Benjamin Obdyke housewrap seams is not required, but if you must tape, use HydroFlash UV+ 2.3 inch seam tape.

2.3 in (60 mm), 4 in (100 mm), 6 in (150 mm), 9 in (230 mm)

LENGTH PER ROLL

82 ft. (25 m)

ADHESIVE

Acrylic

MAX. UV EXPOSURE

365 days (before siding coverage)

TEMPERATURE RANGE

Install down to 25°F, store above 40°F

VAPOR PERMEABILITY

4 perms

HydroFlash® LA is designed for exterior flashing of rough openings, transitions, and seams as part of a high performing air and water management system. Liquid Applied flashing is appropriate for the filling of imperfections, penetrations, or sealing of geometrically challenging areas.

PACKAGING

20 oz. Sausage/12 per carton 10 oz. Cartridge/24 per carton

TYPICAL COVERAGE

8-10 sq. ft. per sausage 3-5 sq. ft. per cartridge

CURED THICKNESS

20-40 wet mils.

COMPOUND TECHNOLOGY

STPU Silyl Terminated Polyurethane

TACK FREE TIME

2-3 hours

CURE TIME

6 hrs

INSTALL TEMERATURE

25° - 100° F

EXPOSURE

180 days

VAPOR PERMABILITY

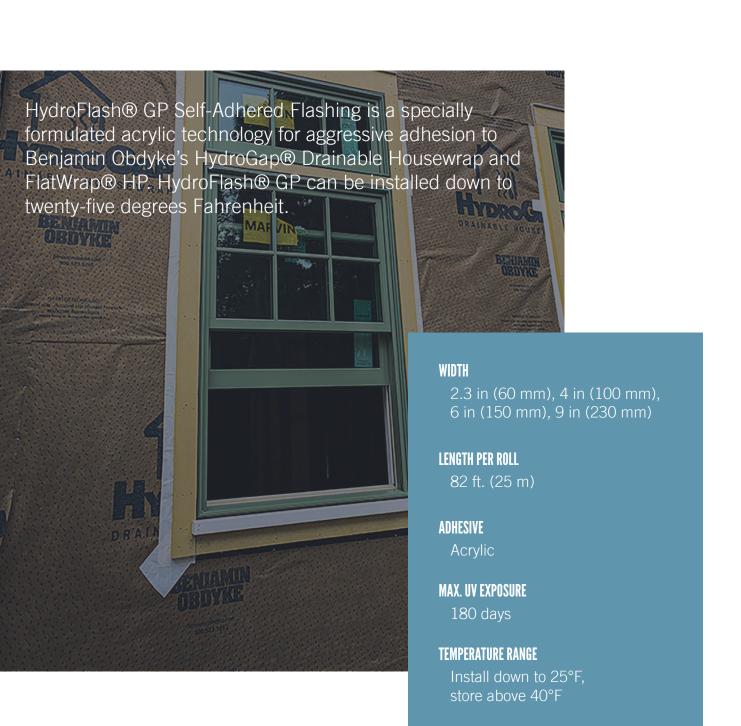

3-6 perms (20-40 wet mils)
