

HydroFlash® LA

LIQUID APPLIED FLASHING

HydroFlash® LA is designed for exterior flashing of rough openings, transitions, and seams as part of a high performing air and water management system. Liquid applied flashing is appropriate for the filling of imperfections, penetrations, or sealing of geometrically challenging areas.

Use for challenging details, easily conforms around corners, curves, and other challenging shapes

Creates a continuous seal with no shrinkage that helps protect rough openings, transitions, and penetrations from water and air infiltration

Vapor permeable to help wall assemblies dry while protecting against moisture intrusion

Can be installed on damp or wet surfaces to reduce weather-related delays

PACKAGING	20 oz Sausages 12/Carton 10 oz Cartridges 24/Carton
TYPICAL COVERAGE	8 - 10 ft ² per Sausage 3 - 5 ft ² per Cartridge
CURED THICKNESS	20 - 40 Wet Mills
COMPOUND TECHNOLOGY	STPU Silyl Terminated Polyurethane
INSTALL TEMPERATURE	25°F - 100°F
MAX. UV EXPOSURE	180 Days
VAPOR PERMEABILITY	3-6 Perms (20 - 40 Wet Mills)
