

HydroCorner®

PREFORMED SILL CORNER PROTECTION

HydroCorner® is a simple, cost-effective way to help protect window sills from water intrusion. The prefabricated corner fits easily into the sill, simplifying installation while helping protect the window-to-wall interface from moisture damage and growing mold. Place one HydroCorner® in each sill corner, and then cover with a piece of self-adhered flashing HydroFlash® for a quick and easy-to-install sill treatment.

Helps create a reliable sill pan that directs water away from the window opening, keeping walls dry and helping prevent the buildup of mold

Durable material resists cracking in cold weather or damage during window installation

Reduces the time and effort required to create window sill corners

Simplifies window sill flashing by providing a prefabricated corner

Installs quickly with no special tools or complicated detailing

Allows for more consistent sill flashing across every window

PACKAGING

100 Pieces per Carton

DIMENSIONS

5 in x 5 in x 2.5 in
