

InvisiWrap® SA

SELF-ADHERED WRB WITH ENHANCED UV RESISTANCE

InvisiWrap® SA combines a self-adhered weather-resistive barrier with advanced UV protection for open-joint cladding applications and projects requiring extended UV exposure before cladding installation. Its continuous adhesive reduces air leakage, while exceptional vapor permeability and moisture management support long-term wall assembly durability and performance.

UV Rated for 365 days before cladding installation

100% continuous acrylic adhesive technology provides true sealing around every fastener and penetration point

Approved for use in Open Joint Cladding Assemblies with openings up to 2 in when installed with Batten UV

Adheres to OSB, CDX, plywood, and CMU without the use of a primer above 25° F

WIDTH	4.75 ft (1.45 m)
LENGTH PER ROLL	80 ft (24.38 m)
MAX. UV EXPOSURE	365 Days
VAPOR PERMEABILITY	10 Perms
ADHESION	Continuous Acrylic
FIRE RATING	Class A
