

AVAILABLE AIA/CEU COURSES

presented by benjamin obdyke

all courses available through virtual webinars

HEALTHY HOME: CONTROL LAYERS WORKING TOGETHER

BOI106 • 1 LU|HSW

Understand why moisture management becomes more critical as we focus more on our building's air tightness.

Recognize a true air barrier's characteristics and benefits in the wall assembly.

Explain how all control layers in a wall assembly work together to prevent failure.

A RANGE OF RAINSCREENS: AN IN-DEPTH LOOK AT THE VARIETY OF RAINSCREEN APPLICATIONS

BOI105 • 1 LU|HSW

Understand the performance characteristics of rainscreens in the building envelope.

Understand and identify the installation applications of open and closed rainscreens.

Recognize the pre-installation considerations when choosing the appropriate rainscreen application.

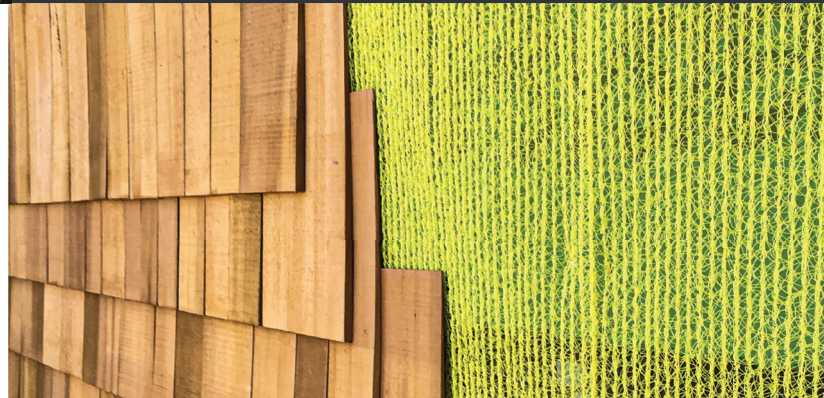

DRAINAGE + DRYING IN THE EXTERIOR WALL

BOI103 • 1 LU|HSW

Recognize the integral role of a gap within the exterior wall.

Understand the selection criteria to consider when designing for moisture management in wall systems.

Learn the appropriate ways to determine drainage and drying principles for a variety of cladding systems.

THE WIDE WORLD OF WRBs: SPECIFYING WRBs AS PART OF A HIGH PERFORMANCE SYSTEM

BOI102 • 1 LU|HSW

Understand the performance characteristics of Water Resistant Barriers.

Gain knowledge to select the best WRB option for your particular project.

Understand how to best integrate peel and stick flashing with housewrap.
