

# VAPORWISE™

VAPOR-VARIABLE INTERIOR MEMBRANE

Introducing VaporWise™, the cutting-edge solution for optimal moisture control in cold climates. Our advanced tri-laminate membrane sets a new standard in interior vapor barriers, offering exceptional performance and versatility for your insulation needs.

Tri-Laminate membrane complies with a Class II interior vapor retarder for use in cold climates

Variable vapor performance increases during summer months to dry the wall cavity

Reinforced mesh and translucent membrane are ideal for blown-in cavity insulation

Compatible with all permeable interior insulation applications, including loose-fill and batt insulation

Can be applied to interior roof and wall framing and detailed for an air control layer

Seams and terminations can be sealed with HydroFlash® UV+, GP, and HydroTape® DS

<b>WIDTH</b>	4.92 ft (1.5 m)
<b>LENGTH PER ROLL</b>	164 ft (50 m)
<b>COMPOSITION</b>	Polypropylene Tri-Laminate
<b>VAPOR PERMEABILITY</b>	Variable, 0.14 to 14
<b>GROSS COVERAGE</b>	806 sq. ft./roll
<b>FIRE RATING</b>	Class A
