

AERO NET™

WALL & ROOF VENTILATION MAT

AeroNet™ is a revolutionary compression-resistant rolled rainscreen and ventilation mat solution for the wall and roof. AeroNet™ provides maximum moisture protection by creating a gap for continuous airflow behind siding and roofing material – preventing the risk of trapped moisture.

Easy install on the wall or roof with its lightweight, flexible design

Creates an air gap behind roof and wall materials to promote drainage and drying

Saves time and labor costs by eliminating the need for furring strips

Superior compression resistance compared to traditional rolled products

Excellent rainscreen solution behind a variety of cladding material

Ideal ventilation mat to pair with metal, composite, and cedar roofing

THICKNESS (Size of Gap)	.25 in (6mm)
WIDTH	39.4 in (1m)
LENGTH PER ROLL	61 ft (18.58m)
COVERAGE PER ROLL	200 ft ² (18.58 m ²)
MAX. UV EXPOSURE	120 days
